

Weeds of Sweetwater Creek – Recognition and Treatment

Bridal Creeper (*Myrsiphyllum asparagoides*) origin S. Africa

Description: Small narrow glossy pointed leaves, white flowers, green berry maturing to red.

Habit: Climbs over and entwines bushes, forming a thick mat. Spreads by seeds and by its rhizomes beneath the soil.

Treatment: Carefully dig below the base of the plant and ease out the clump of multiple pointed heads. Be sure to remove all pieces and bag.
